3ft Mini Ramp Hire

Our three foot high mini ramp is designed to be easily erected in just one hour.

This ramp is great for public participation and beginners and is a fun ramp for riders of all ages and abilities across all the wheeled sports. This ramp is available for dry hires as well as being available as part of a package, which can include pro demonstrations and/or workshops.

This ramp has a Skatelite surface which means zero water absorption making it hard for rain to stop play. This ramp requires reasonably level ground and an area of 8 x 12m including 2m safety zone around the ramp.
