

8ft Midi Ramp Hire

Our eight foot high midi ramp is designed to be easily erected in just one day.

This ramp is great for public participation and beginners and is a fun ramp for riders of all ages and abilities across all the wheeled sports. This ramp is available for dry hires as well as being available as part of a package, which can include pro demonstrations and/or workshops.

This ramp is the only ramp of its size available in the U.K standing at 8ft tall making it midway between a mini ramp and a vert ramp. This ramp requires reasonably level ground and an area of 7.5 x 15m including a 2m safety zone around the ramp.
