

## 4ft Mini Ramp Hire

Our four foot high mini ramp is designed to be easily built in just two hours.

This ramp is great for public participation and works well for riders of all ages and abilities across all the wheeled sports. This ramp is available for dry hires as well as being available as part of a package, which can include pro demonstrations and/or workshops.

This ramp is self contained on the trailer on which it arrives, so vehicle access is required to drive the ramp in to position. This ramp requires reasonably level ground and an area of 5.6 x 10m including a 1m safety zone around the ramp.
